

GHA Solutions

Empowering companies to realise their full potential through innovative use of information and communication technologies

CAPACITY OVERVIEW

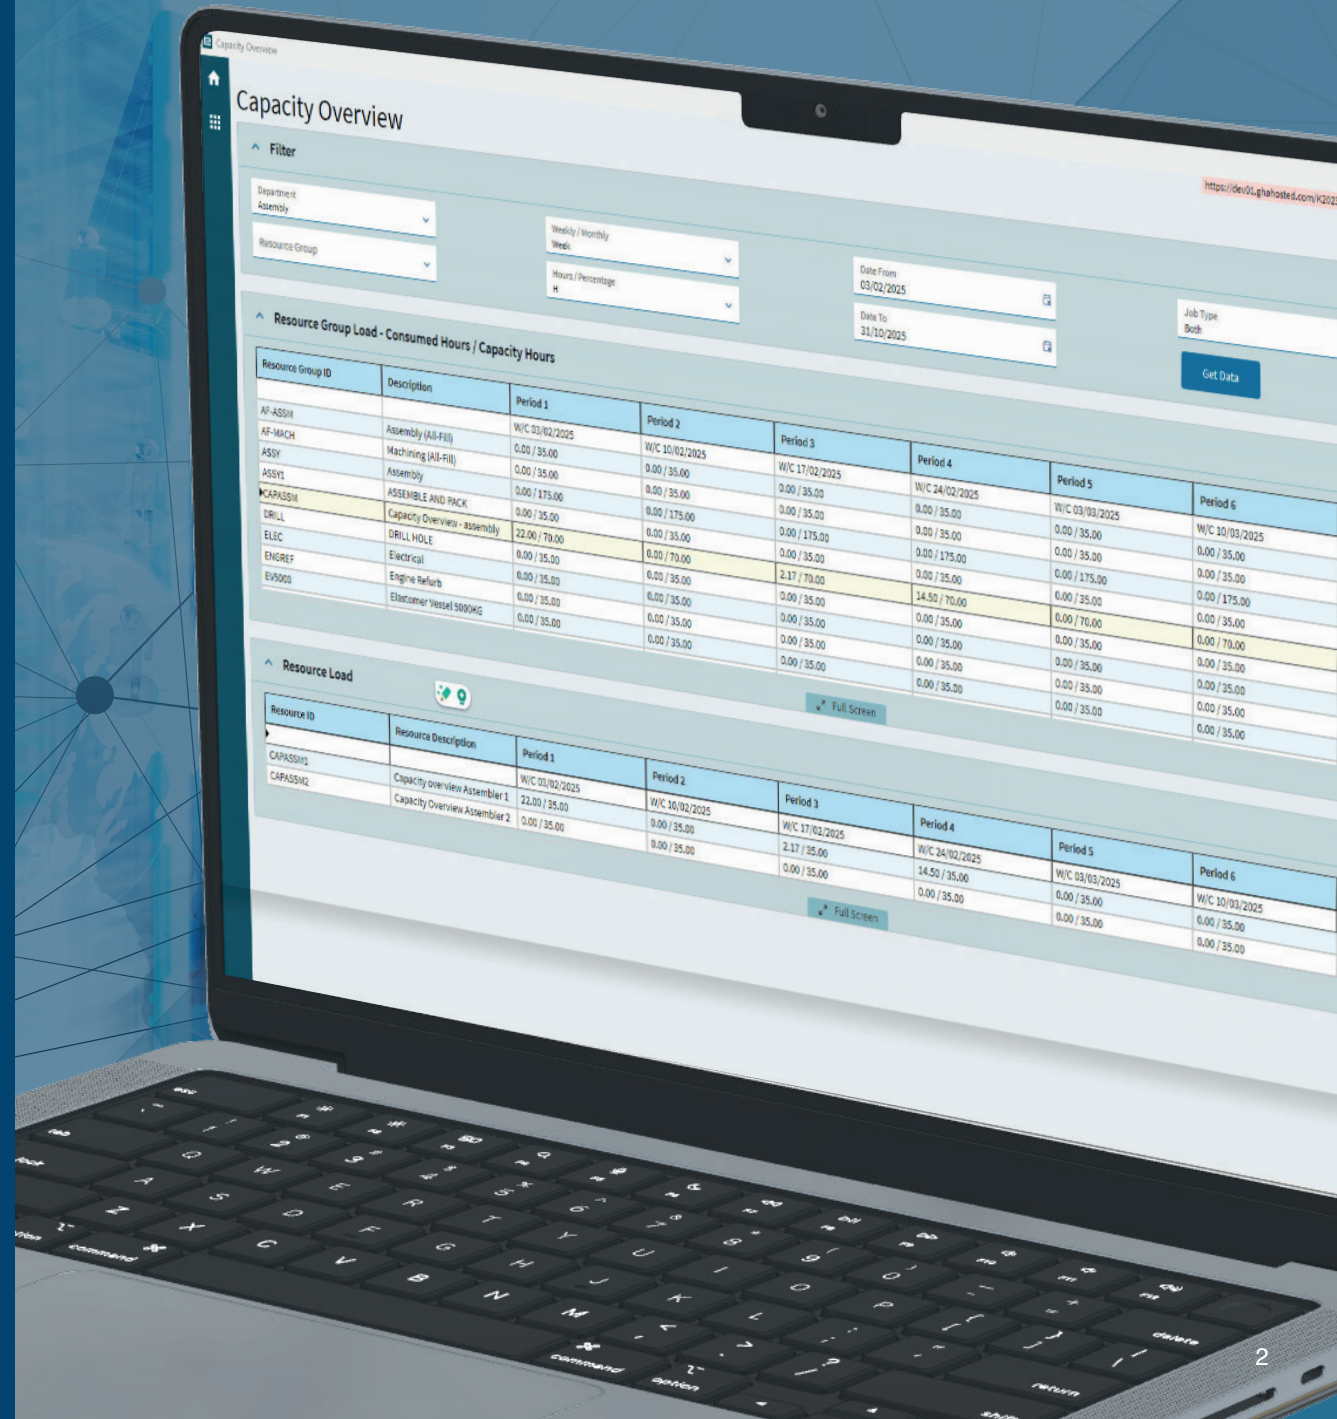

GHA's Capacity Overview shows capacity by resource in either weekly or monthly buckets. It shows both firm and unfirm load. The load can be shown as hours available against hours booked or as a percentage. Take control of your production, contact us for a demonstration.

Excellence in ERP

Using a powerful algorithm, demand is populated into a new table and displayed in an easy to read and understand format.

The capacity dashboard allows the company to interrogate their firm and unfirmed hours by resource and resource groups over designated periods, giving visual insight to spare capacity/ underutilised resources, this tool gives your production and sales team insight into actual capacity available to fill or sell.

There's More

This is just one of the many enhancements GHA provide to maximise your Kinetic ERP potential.
