

GHA Solutions

Empowering companies to realise their full potential through innovative use of information and communication technologies

MASTER CALENDAR

GHA's Master Calendar functionality allows the scheduling team to lever the full functionality of individual calendars for each resource by reducing repetition in calendar maintenance.

Description
Master Calendar

Default Hours Per Day
24

^ Hours per Day

Day	Select Row	1	2	3	4
Select Column	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Sunday	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Monday	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Master Calendar

The GHA Master calendar functionality alleviates this problem by designating one of the production calendars as the master for companywide non-working days.

When a non-working exception is created on the master calendar, a checkbox has been added to indicate if this is to be copied to all child calendars.

Scheduling

Create Calendar

Auto Update Calendar

Calendar
VMC002

Calendar Description
5 Days 20 Hrs per day

Queue Hours
0.00

Move Hours
0.00

Epicor functionality allows each resource to have its own calendar, this means maintenance and downtime windows can be applied to individual resources optimising the scheduling capabilities of the system.

To remove the manual configuring of non-working days on individual calendars, GHA's Master Calendar functionality gives you the capability to copy the standard nonworking days to each individual calendar saving time, ensuring consistency across resources and groups.

Exception

Exception Label
Non Work Day

Copy To All Calendars

On the resource, a new calendar is created automatically, with the same ID as the resource, this is then updated with the global non-working days from the master calendar.

This allows the company to update one calendar for global standard nonworking days, such as shutdowns, bank holidays etc, while also keeping the individual resource calendar functionality for scheduled maintenance etc.

There's More

This is just one of the many enhancements GHA provide to maximise your Kinetic ERP potential.
